'DRY' BY BOTANIC&FRUITS, DRIED FRUITS IN MULTIDOSE FORMAT

Botanic & Fruits offers you the largest variety of dehydrated fruits, with a unique aroma, texture and color, that gives all your drinks a different personality.

We select the fruits for their origin and quality before submitting them to a careful process of handling, cutting and dehydration that allows us to guarantee a final product without comparison.

With the objective of satisfying the demand of the cocktail world and hotel and restaurant business, we present our 'Dry' line as a multidose format.

With its exceptional quality, 'Dry', by Botanic & Fruits, offers an intense aroma, natural flavor and magnificent appearance, retaining all these properties for a long period of time.

The multidose package allows the availability of seasonal fruits throughout the year and avoids losses caused by fresh products.

Ideal for gin-tonic, vodka-tonic, cocktails, infusions and all kinds of mixed drinks.
